

DealOngo

Smart and busy pocket office

**A PERFECT TOOL FOR SMALL COMPANIES AND SOLE TRADERS
NO ACCOUNTING SKILLS REQUIRED * READY TO USE**

DealOngo software for mobile order processing, stock control, customer/vendor database management is tailor-made for small companies and sole traders taking orders on the go. **DealOngo** handheld tool handles all stages of order processing, sales tracking, goods delivery and stock control processes for busy professionals.

Benefits:

- Easy On-the-Go Invoicing
- Stock Control
- Tracking Payments
- Managing Deliveries
- Customer/Supplier Records
- Tax/Discount/Price Level Auto Calculation
- Universality and Flexibility
- Eliminating Paperwork

Keep all these features always at hand: on-the-road, on customer sites, at trade shows, etc.

DealOngo will upgrade your PocketPC device to a fully operational office. In your business travels you will have all the necessary sales data at your disposal - no time lost when serving customers, checking stock, placing orders or finding the right answer to the clients demands. Achieve your goal during a single visit, reduce error chances, improve speed and accuracy of your services. Now all the required sales documents can be produced on site by browsing/editing your customer, vendor or product database. All totals, discounts and taxes are automatically calculated and updated for you in any sales document. **DealOngo** will optimise your stock levels and speed up document circulation: more time for improving and expanding your business.

DealOngo is quite simple to use to, it successfully combines an easy-to-understand interface with all the powerful features necessary to automate your sales force. It is flexible enough to fit any sales organization structure and documents circulation system, with no necessity to adjust them for using new tool.

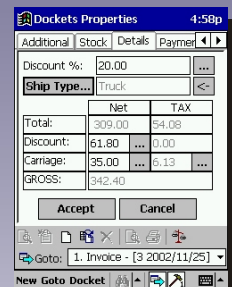

**BOXED
VERSION
AVAILABLE**

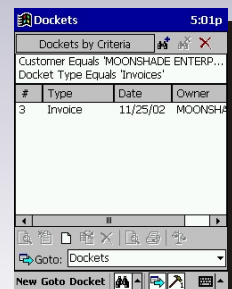

Easily manage your customer and vendor database; set the key properties of each account for further automatic adjustments.

Multiple price levels for each product allow you to develop a flexible price policy.

Create any docket type with auto calculation of key values.

Search your document database using filters of any complexity level.
